There are some things you can only see when you go by foot. Use this map to find those things, and choose your route based on time and trail type. When you walk—in work, school, the store, or a park—you are improving your health, building community, and keeping our air and water clean.

Take pictures of what you see on your walks! Send them to Feet First by emailing info@feetfirst.org.

Receive more information or a printed walking map by calling 206.652.2310 or visiting www.feetfirst.org.

There are some things you can only see when you go by foot. Use this map to find those things, and choose your route based on time and trail type.
West Seattle has an extensive network of trails; these "trails" are a combination of established park trails, favorite streets of some residents, and paths taken by the majority of people out walking or biking to school. The trails are used by people of all ages and can be found throughout West Seattle. This is an opportunity for residents, businesses owners, community groups, and schools to participate in the growth of our neighborhood wayfinding kiosks in West Seattle.

The first neighborhood wayfinding kiosks in West Seattle were developed with funds from the City of Seattle Department of Neighborhoods. Each kiosk provides a place to post information and events happening in their neighborhood. We invite you to Adopt-a-Kiosk to manage a kiosk in your neighborhood.

Adopt-a-Kiosk Program

The Adopt-a-kiosk program is an opportunity for residents, businesses owners, community groups, and schools to participate in the growth of our neighborhood wayfinding kiosks in West Seattle.
